

YOUR EYE CARE TEAM ...

Thank you for choosing the Sachse Family Eye Clinic!

Your trust in us through the years mean so much. We are privileged to be your primary eye care provider and eyewear needs. Our commitment has always been family focused. We understand that if we treat you as we would treat our own family members, the care and compassion is delivered naturally, without hesitation or compromise. This extends to answering any questions as well as to the exceptional quality of products that we provide. This is our commitment to you, each and every patient that walks through our doors.

OUR DOCTORS *A family serving you...*

Dr. Steven Le

Dr. Melanie Truong
Drt@sachseeyes.com

Drs. Melanie Truong and Steven Le are husband and wife. They both graduated from the Pennsylvania College of Optometry in 2000 and have been in practice in Texas since. They were educated and trained by the most versatile and experienced professionals throughout their education and externship program as well as through their network of support. They both have experience in hospital based optometry, group practice setting as well as individual private practice setting.

They are both Therapeutic Optometrists as well as certified Optometric Glaucoma Specialists through the Texas Optometry Board with coursework through the University of Houston School of Optometry in 2007. Adept to change, they both have an eager desire to advance their practice and their knowledge by meeting and exceeding their continued education throughout their career. Along with this, their professionalism with each other allows a mutual respect and constant deliberation towards the profession. Many people are surprised to find that they were high school sweethearts.

Drs. Steven Le and Melanie Truong have two children, live in Sachse. Dr. Le loves to fish and enjoys playing the guitar while Dr. Truong (Dr. T) loves to read, discuss philosophy and learning new things in science

Chemical/Mechanical Burn Treatment

Optical Products

Uncompromised quality & standard

At the Sachse Family Eye Clinic, we have come to develop and understand with a keen sense of expertise in our eyewear and products. We know that the right lens technology and superior quality of products will ultimately make the difference between good vision and the best quality vision possible.

Why is that important? Because it is the difference between getting work done without extra straining or adapting. Increasing efficiency and increasing level of performance for you so you stay on task. We have worked continuously to keep up with the latest technology and advances through our constant updating, and education through industry experts. We also know that cost is a very important factor in any family whether it is in the current economic conditions or otherwise. With our in house lab and resources, we are able to control cost to provide value without sacrificing quality in our products. This combination results in quick turn around time on most eyeglasses that are not specially ordered. Our optical dispensary carry the latest designer eyewear such as Dolce Gabbana, Versace, Kenneth Cole, just to name a few. We specialize in all types of eyewear from children to adults of all ages.

Our in-house finishing lab can manufacture a pair of eyeglasses while you wait if needed.

Safety eyewear is also available for you or any company that require safety eyewear for their employees.

Emergency Eyeglasses Need glasses in hurry because your current pair lost or broken, our in house lab can manufacture those quickly for single vision lenses.

CHILDREN'S EYE CARE

With understanding, care and creativity...

The doctors and staff of the Sachse Family Eye Clinic understand that a positive experience makes a difference in providing an exceptional first eye exam. It is this first experience that can generate a healthy appreciation of eye care and eye health at the earliest of ages. This is why we have dedicated an exam room specifically for those young and young at heart.

The art work on

each of the 4 walls represent those favorite Disney characters that we have grown up and have become a part of our child and childhoods. Come see our room of Disney characters. Say "hi" to Lightning McQueen as you get your vision checked, or wave to Cinderella as we make sure your eyes are healthy! We love this room as much as our patients have come to love requesting for it. We welcome a tour anytime if you just want to peek before your exam!

INFANTSEE

It's never too early ...

The doctors of the Sachse Family Eye Clinic are trained at providing pediatric eye exams as well as treating conjunctivitis or eye infections for children and infants.

It is never too early to screen for and examine for conditions such as retinoblastoma, a very serious and lethal tumor of the eye that occurs in approximately 2000 cases a year. Along with conditions such as amblyopia, hyperopia, nearsightedness, blepharitis, as well other severe vision disorders that can permanently affect a child's life and vision if undetected early in life. Drs. Steven Le and Melanie Truong were trained specifically in Children's Binocular Vision Assessment through the Pennsylvania College of Optometry. Where emphasis was in obtaining skills and knowledge towards examining an uncommunicative patient such as those newborns or those not able to communicate effectively. We are proud to be able to provide this type of service these most special and precious of patients!

If you have questions or concerns about your child and would like to communicate to our doctors directly you may call our office at 972-675-9626 or email Dr. Truong at drt@sachseeyes.com.
